TENTH OF MILE

WEST GARLAND POND

Garland Twp., Penobscot County
U.S.G.S. Garland, Maine

Fishes

Brook trout
Yellow perch
Chain pickerel
Minnows
Blacknose dace
Creek chub

White sucker
Hornpout (bullhead)
Pumpkinseed sunfish

Physical Characteristics

Area - 32 acres

Maximum depth - 38 feet

Temperatures:

Surface - 70°F
36 feet - 41°F

Principal fisheries: Brook trout, chain pickerel, yellow perch

West Garland Pond contains large numbers of warmwater fishes. Chain pickerel are abundant in this small pond and provide for some 'fast' fishing.

An annual brook trout stocking program was initiated in 1985 when it was determined that large hatchery fish could survive under the heavy competition from the warmwater species. Chemical reclamation of West Garland Pond is not an option because complete removal of undesirable species is unlikely due to the long marshy tributary.

Surveyed - July, 1956

Revised - 1997
